

DVO Series

Dry Vacuum Pumps

DESCRIPTION

Zurich DVO series pumps are oil-free vacuum pumps designed and manufactured for a wide variety of applications where air is the gas and where operation is in the low to medium vacuum range. They are ideal for the replacement of Becker, Rietschle, and other brand pumps.

Zurich DVO series vacuum pumps are ideal for applications as material handling, sampling, hold-down, testing, packaging, molding, medical, laboratory, and the printing industry. In general, the DVO series pumps are best suited for applications where regenerative blowers cannot reach a deep enough vacuum or where oil-flooded vacuum pumps would emit excessive oil aerosols.

FEATURES

- 100% oil-free
- Extra long life, self adjusting carbon vanes
- Low noise level
- Low temperature rise
- Inlet filter and vacuum relief valve
- Vibration isolators
- Superior warranty
